LIGHTING FACES WORKSHOP

Price: \$395.00 CSC members
\$550.00 non-members

Hands-on means experience

The CSC believes that the best training comes from doing.

This **two day hands-on** lighting faces workshop offers the participants **practical knowledge** on the fundamentals of achieving the most efficient and **captivating lighting** setups.

Not your typical 3 point lighting setups

Lighting faces isn't a one-size-fits-all setup. Accredited "csc" instructors will demonstrate the importance of **background geometry, perspective, texture** and **colour** for the best camera placement.

In this workshop we will **focus** on ways to create natural and pleasant lighting setups that will **benefit** both **you** and **your clients**.

Topics for this workshop will include

- hard and soft lighting
- contrast ratios
- broad, short and glamour lighting
- light control
- modeling
- depth of field
- colour temperature
- inverse square law
- composition
- single and two camera setups

Participants are encouraged to bring a light meter (if you have one) for the practical exercises.
Continental Breakfast, snacks and lunch will be provided.

For an **application** and **detailed itinerary** please visit the CSC website: www.csc.ca

telephone 416-266-0591

Instructors are subject to change upon availability

The CSC since 1957
